PROFESSIONAL PROFILE

I am a young and passionate senior student in Software Engineering who is deeply interested in both frontend and backend development. I consider myself a self-taught individual with strong critical thinking and problem-solving skills.

PROFESSIONAL EXPERIENCE

National University of Costa Rica
Learning Support Tutor

Nicoya, Guanacaste, Costa Rica
2021 - Current

I am part of the Academic Success Unit at the University of Costa Rica, an organization that promotes academic support for students through various strategies and support services. In my role, I collaborate in facilitating tutoring classes for university students, with the goal of strengthening their retention and academic performance.

Courses taught

- Computer Science Fundamentals.
- Programming I.
- Programming II.

Responsibilities and achievements:

- Application of programming logic in languages such as C++ and C#.
- Design and implementation of RESTful APIs using ASP.NET Web API.
- Monitoring of students' academic progress, providing constructive feedback to improve academic performance.
- Organization and scheduling of personalized tutoring sessions to provide additional support to students who require it.
- Development of educational content using challenge-based learning and the service-learning method to encourage active participation and real-world problem-solving.

STRENGTHS

- Ability to reason step by step, solving complex problems by breaking them down into smaller parts.
- Teamwork and communication
- Patience and perseverance
- Critical thinking.
- Continuous learning
